The UAW TOP Department (then called the Office Workers Department) was set up at the 1953 convention under the direction of Walter Reuther to coordinate the organizing of auto industry workers not involved in shopfloor production -- clerical workers, engineers, designers and technicians. Later, the TOP Department extended its organizing activities to white collar workers outside the auto industry, including health care professionals. In 1964, advisory councils were set up in selected geographic areas throughout Canada and the United States, the first one in Region 9, to provide a forum for white collar workers and engineers to discuss common needs.

The UAW TOP Department Collection contains correspondence; organizing and negotiations files (arranged both by company name and subject); TOP Department chron files; TOP advisory council and conference files; National War Labor Board and NLRB cases (arranged by company name); Management-Shop Committee minutes; and other material related to the organizing and servicing of UAW white collar members.

PLEASE NOTE: Folders are computer-arranged alphabetically within each series in this finding aid, but may actually be dispersed throughout several boxes in the collection. Note carefully the box number for each folder heading.
